I scored this by hand and worked out the amount to add to actual finishes based on Zacklee.(the slowest rated boat) I calculated the seconds each boat owed the slowest boat, Zacklee. Multiplied this by the course length, 7.5 miles. Coverted to minutes and seconds and added the result to the boats actual finish time.

Next year we will build in the option to move the SM1 mark closer in increments of half miles. Always on the same bearing from SS.
